2.Safety Precautions and Warnings

To prevent personal injury or damage to vehicles and/or the tool, read this instruction manual first and observe the following safety precautions at a minimum whenever working on a vehicle:

◆ Always perform automotive testing in a safe environment
◆ Wear safety eye protection that meets ANSI standards
◆ Keep clothing, hair, hands, tools, test equipment, etc. away from all moving or hot engine parts
◆ Operate the vehicle in a well ventilated work area: Exhaust gases are poisonous
◆ Put blocks in front of the drive wheels and never leave the vehicle unattended while running tests
◆ Use extreme caution when working around the ignition coil, distributor cap, ignition wires and spark plugs. These components create hazardous voltages when the engine is running
◆ Put the transmission in PARK (for automatic transmission) or NEUTRAL (for manual transmission) and make sure the parking brake is engaged
◆ Keep a fire extinguisher suitable for gasoline/chemical/electrical fires nearby
◆ Don't connect or disconnect any test equipment while the ignition is on or the engine is running
◆ Keep the tool dry, clean, free from oil/water or grease. Use a mild detergent on a clean cloth to clean the outside of the scan tool, when necessary
